Professional Experience

Associate Lecturer and Research Supervisor (at University of the West of Scotland UK).
May 2022 – Present

- Lead, supervise, and quality-assure undergraduate and postgraduate research projects, ensuring robust qualitative methodologies, ethical compliance, and inclusive research practices.
- Coach and mentor students in applying appropriate research methods, synthesising findings, and generating evidence-based insights.
- Deliver teaching across modules including Strategic Management, Research Skills, Leadership Theories, Ethical Leadership, Organisational Health, and Leading Change.
- Support students to identify user needs, frame research questions, and translate research findings into clear, actionable outputs.
- Champion continuous improvement and quality assurance, contributing to programme reviews, assessment moderation, and enhancement of teaching and research practice.
- Communicate complex research findings clearly to diverse audiences, influencing learning outcomes and decision-making.
- Collaborate with academic and professional services colleagues within multidisciplinary teams.
- Contribute to departmental research development, including support for funding proposals and externally funded research activity.
- Ensure timely reporting, marking, feedback, and compliance with institutional quality standards.

Business Analyst (User Research Focus at Digital Banking Direct) –July 2020 – December 2020

- Planned and conducted qualitative user research, including stakeholder interviews and workshops, to understand user needs in a digital service context.
- Worked within a multidisciplinary agile team, collaborating with developers, subject matter experts, and delivery leads.
- Translated research findings into clear user needs, user stories, and acceptance criteria.
- Supported service validation through user acceptance testing, ensuring solutions met user and business needs.
- Communicated research insights to influence service design and delivery decisions.

Business Analyst (Healthcare Services); February 2018 – May 2020

- Led discovery-phase research to understand operational and user needs for healthcare digital services.
- Conducted interviews and observations with clinical, operational, and technical users.
- Produced user journeys, workflow diagrams, and evidence-based recommendations to improve service delivery.
- Collaborated with multidisciplinary teams across design, development, and operations.
- Ensured research outputs were accessible, usable, and aligned with organisational objectives.
